

Name: _____ Date: _____

WHAT DO YOU ALREADY KNOW?

1) How does the movement of things like air, water, and food impact the survival of plants and animals in nature??

2) What might happen if a new animal or plant is brought to a place where it doesn't belong? How can this change the balance of nature?

3) How can we make sure that we take care of our environment so that plants and animals can live and grow?

4) How do plants make their own food using sunlight and air? How does this help other animals and creatures?

5) How can we be good helpers for nature and make sure that we don't hurt plants and animals in our environment?

6) What happens to plants and animals when there are big changes in the weather or when natural disasters happen? How can we help them recover?
